

New for the 2011 season, Bulldog is introducing the **BB-1** for Midget racing. This "Baby Bulldog" will feature all the same standard equipment as our XR-1 and XR-2 sprint car rears. The rear will be available with a 3.78 ring and pinion. A super strong casting and axle make the BB-1 the choice for strength and reliability. Be sure to check [www.bulldogrears.com](http://www.bulldogrears.com) for more information regarding the BB-1.
